Education

Bachelor of Information Systems 07/2018 – 07/2022
Faculty of Computers and Artificial Intelligence, Cairo University

Professional Experience

Frontend Web Developer, Azm Squad 06/2025 – present | October, Egypt
Built and maintained responsive web applications using Vue.js (2 & 3), TypeScript, and modern JavaScript frameworks. Architected scalable component-based solutions that enhanced user experience and met complex business requirements. Implemented best practices for code maintainability and performance optimization

Frontend Web Developer, SeamLabs 06/2024 – 06/2025 | Al Sheikh Zayed, Egypt
- As a Frontend Web Developer specializing in Angular, I design and implement dynamic, user-friendly interfaces using Angular frameworks and technologies. Collaborating with product and design teams, I bridge the gap between creative vision and technical execution to deliver seamless user experiences.
- Leveraging Angular's features like RxJS and TypeScript, I craft scalable, high-performance applications that align with user needs and business goals.

Frontend Web Developer, ATW Ltd. 09/2021 – 07/2024 | Cairo, Egypt
- As a front-end developer, I work closely with designers, producers, and our offshore teams in a global effort to roll out a refresh of the company website. My responsibilities include but are not limited to, maintaining and updating our codebase, as well as incorporating new, rich interactive experiences into the website.
- Involved in developing the UI pages using HTML, CSS, Javascript, JSON, Jquery, Ajax, and Axios.
- I have utilized HTML, CSS, SCSS, Bootstrap, and Vuetify within the Vue.js framework to create a responsive user interface. Additionally, I have worked extensively with Angular including building and maintaining components, services, and modules to deliver scalable and robust front-end solutions, leveraging Angular CLI, RxJS, and TypeScript for efficient development.

Frontend Web Developer Intern, ATW Ltd. 07/2021 – 09/2021 | Cairo, Egypt
- Developed code to convert design wireframes into website elements under supervision Used HTML, CSS, bootstrap, and JavaScript
- Used Jquery and Ajax for the service call on pages to interact with the server for information.
- Used Ajax, JSON to send the request to the server to check the functionality of the website.
- Created responsive sites and flows that can be viewed on mobile as well as desktop.

Certificates

Frontend Web Developer Internship certificate
ATW Ltd.

JavaScript Udemy Courses Certificate
Udemy

Modern JavaScript (ES6)
Mahara-Tech

egFWD Web Development Challenger Track Certificate
Udacity nad FWD

Full Stack Development Track
Udacity

Soft Skills

- Adaptability
- Time Management & Prioritization
- Mentorship & Knowledge Sharing
- Attention to details
- Team Collaboration

Technical Skills

- HTML
- JavaScript (ES6+)
- Nuxt.js
- Next.js
- Vuetify
- RxJs
- SSR
- BEM, OOCSS, SMACSS
- Real-time Applications (WebSockets, Pusher, Firebase)
- Vite / Webpack
- Linux
- PHP
- CSS3
- TypeScript
- Angular
- Ionic
- Tailwind CSS
- Pinia
- Responsive & Mobile-First Design
- Internationalization
- Google Maps Integration
- .NET / ASP.NET Core
- Node.js
- Agile
- SCSS / SASS
- Vue.js
- React.js
- Quasar Framework
- Bootstrap
- RESTful APIs
- Accessibility
- SEO for SPAs
- Charts & Data Visualization
- Git
- MySQL

Projects

AZM Website– Saudi AZM for Communication & Information
Corporate website for AZM, a Saudi technology and digital transformation company, showcasing its services, solutions, and company profile with a modern, interactive user experience.
Built with: React, TypeScript, Tailwind CSS, and Framer Motion for smooth, engaging animations.

Tasel, Digital Real Estate Platform – Saudi Arabia
A licensed real estate web platform that connects property owners, licensed marketers, and buyers, enabling property listing, discovery, and sales lifecycle management through a unified digital experience.
Built with: Vue.js, Quasar Framework, Vite, Tailwind CSS, SCSS, RESTful APIs, Firebase, Google Maps API

Tanafos, B2B Procurement Platform – Saudi Arabia
A web-based procurement and marketplace platform designed to streamline purchasing processes for non-profit organizations by connecting them with verified suppliers, enabling competitive bidding, and simplifying procurement workflows.
Built with: Vue.js, Quasar Framework, Vite, TypeScript, Tailwind CSS, SCSS, RESTful APIs, WebSockets, Responsive Design

BidxSell, Premier online horse auction platform
Developed an online horse auction platform enabling secure buying/selling of horses through digital auctions with real-time bidding and transparent transactions.
- Real-time auction system with live bidding
- User authentication & horse listing management
- Search/filter system
- Mobile-responsive design & admin dashboard

Built with: Angular, TypeScript, RxJS, Angular Material, Laravel Broadcasting (Pusher), RESTful APIs, responsive CSS

Sahl(STC)
This project involves the development of a comprehensive hybrid mobile application using Angular and Ionic frameworks, specifically tailored to meet the needs of employees within an organization. The application serves as an all-in-one platform, offering eCommerce functionalities alongside tools for managing vacation requests, tracking attendance, and visualizing employee-related data through dynamic dashboards. Designed to deliver a seamless and responsive user experience, the app is optimized for multiple platforms, including both iOS and Android.
Built with HTML5, CSS3, TypeScript, Angular, Ionic Framework, Ionic Cordova, and RESTful APIs.

Boulevard (STC), Project Management system
System for device maintenance management that was built using Nuxt.js and integrated with APIs, Google Maps, and QR code with taking into consideration Css Methodologies [BEM - OOCSS - SMACSS]

ML Dashboard, AI Analysis
System to analyze resources and provide stakeholders with useful statistics to make informed decisions. This system was built using Nuxt.js, Axios and Vue chart js while taking into consideration CSS methodologies [BEM - OOCSS - SMACSS]

Supply Chain, (Point of sales, E-Commerce, Admin panel, Multi Vendor)
That was built using HTML, CSS, Bootstrap, Javascript, Ajax, JQuery, and Nuxt js, and Axios.

Learning Management system
Learning Management System (LMS) with features such as user authentication, course management, content delivery, assessment tools, and progress tracking. That was built vue js and Axios.

UI Projects
Projects built with HTML, CSS, Bootstrap, JavaScript, and Ajax.

Portfolio
This is a responsive portfolio project that represents my projects, skills, and contacts. Built with HTML and CSS Grid.

IP address tracker, IP Address Tracker app To get the IP Address locations
Built with HTML, CSS , JavaScript and IP Geolocation API
